REQUEST FOR DETERMINATION OF CH.251 NON-APPLICABILITY

Submit with a photocopy of a SURVEY, PLOT, OR SITE PLAN showing the work
Allow 3-5 days for Processing

I request that the subject land disturbance activity be reviewed for a written determination of non-applicability of the NJ Soil Erosion & Sediment Control Act (N.J.S.A. 4:24-et seq.). I understand that the fee for this review is \$50 by check or money order made payable to HEPSCD and that should the activity be deemed a project as defined by the Act, I will need to submit a formal application, a signed & sealed site plan to include a Soil Erosion & Sediment Control Plan, and the appropriate fee. I agree that if the proposed activity changes from the site plan submitted with this application, it will render this determination, if granted, void, and will require a reassessment of the land disturbance by the District. Non-applicability means the subject land disturbance does not meet the definition of a project under the Act and as such does not require formal SESC plan certification. The applicant will assume responsibility for determining the need for any appropriate soil erosion control measures.
